PATIENT POWERED.
RESEARCH DRIVEN.

YOU CAN HELP ACCELERATE METASTATIC BREAST CANCER RESEARCH AND **NOW** GET POTENTIAL MATCHES WITH CLINICAL TRIALS

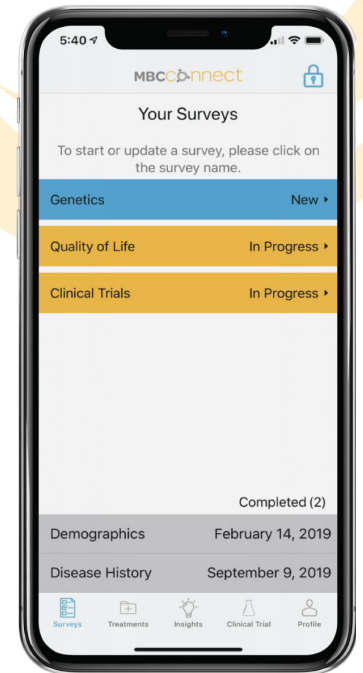

We know that the estimated 155,000 women and men living with metastatic breast cancer in the U.S. are eager to be more active and engaged partners in research to help drive new discoveries. One of the most meaningful actions you can take is to share your MBC disease history, experiences, and quality of life information with researchers.

The MBC Alliance created MBC Connect to provide this opportunity to the patient community.

WHAT IS MBC CONNECT?

MBC Connect is an interactive, web and mobile-friendly patient experience registry, where you can share your MBC disease history, experiences, and quality of life information. And soon — after you enter your demographic information and disease history into the app — you'll get potential matches with clinical trials. To ensure safety and security, your information is encrypted, and any personally identifiable data is removed before it is released or shared.

Available in English and Spanish in the U.S.

WHY JOIN MBC CONNECT?

BE PART OF A MOVEMENT

You have the power — in the palm of your hand — to contribute valuable information to advance MBC research

RECEIVE CUSTOM-TAILORED INSIGHTS

Based on information you enter, we'll send you potential clinical trial matches, personalized insights, and alerts with MBC news and events

DESIGNED BY PATIENTS, FOR PATIENTS

Surveys are brief and easy-to-use, and you can complete them at your own pace

SHARE YOUR MBC EXPERIENCE

Keep a record of your own MBC story and share it easily with your family or health care team — printed out or on your device

UPDATE ANYWHERE, ANY TIME, ON ANY DEVICE

You or your caregiver can update your information at any time, and those updates will sync across all devices

EXPLORE THE DATABASE

You can access and explore the MBC Connect database to understand patterns and trends
